

DIGITIZE ACCOUNTS RECEIVABLE with ACH PAYMENTS

Accepting ACH payments gives your customers more options to pay bills with their preferred online payment method.

How ACH payment processing works.

ACH, or Automated Clearing House, is a regulated network that facilitates electronic payments directly from bank accounts.

Why accounting teams love ACH payments.

Streamlined accounts receivable

- Easily process large dollar amounts over multiple transactions.
- Quicker and more efficient fund transfers between businesses.

Improved cash flow

- No waiting 30 to 45 days for checks to clear.
- Digitized ACH payments typically take just 1-3 days.

ACH payment processing also benefits your customers.

Enhanced security

Authentication and encryption measures in place make ACH transactions less susceptible to fraud.

Cost savings

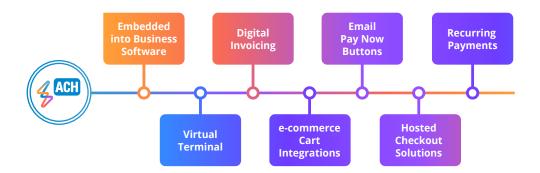

If you offer customers a cash discount, ACH payments mean more money in their pockets.

Convenience and automation

Customers can set up automatic payments, which simplifies their bill pay process.

Ways to accept Trace ACH payments with PayTrace.
