PayTrace

In-Person Payments

Simple, secure solutions for face-to-face card payments

Accept point-of-sale payments with PayTrace the way that works best for your business.

Tap-To-Pay

PayTrace Tap provides customers a quick way to pay with a tap of their card or mobile device.

- Supports Tap to Pay, Apple Pay, Samsung Pay, and Google Pay
- Also processes swipe and chip transactions
- Supported Devices: PAX A77 or PAX A920 Pro

Virtual Terminal + EMV Chip Reader

The PayTrace Virtual Terminal is a PCI-compliant interface that lets you turn your laptop, tablet, or mobile device into a secure credit card terminal.

- Adding an EMV chip reader provides an extra layer of security
- EMV chip reader eliminates the need to manually key in card data

Mobile Application

The PayTrace Go mobile app provides a simple solution to accept card payments with no extra card reader required.

- Works on Apple and Android devices
- Ideal for companies with teams working in the field, like landscaping crews, HVAC/ plumbing, mobile services, etc.

Qualify for Level 3 Preferred Rates on In-person Payments

Regardless of whether a payment is processed online or in person, PayTrace can help reduce the credit card processing fees on qualifying transactions through interchange optimization.
