

AUTOMATE ACCOUNTS RECEIVABLE

with Trace AR™ for Acumatica

By digitizing your invoicing processes, you can eliminate manual work, cut costs, and get paid faster.

Process and automate payments *inside* Acumatica.

With payments embedded into Acumatica, you'll have a clear view of customer transactions related to sales orders and invoices, providing real-time insights and accelerating your order-to-cash.

Your clients can pay using their preferred debit and credit cards. Plus, all sensitive data is stored securely by PayTrace, helping you maintain PCI compliance.

| Branch | Shipment Nbr | Order Type | Order Nbr | Inventory ID | Related Items | Substituted Required | Suspended Target Equipment ID | Component ID |
|-----------|--------------|------------|-----------|--------------|---------------|----------------------|-------------------------------|--------------|
| PRODWHOLE | 006083 | SO | 000281 | AALG0500 | | | | |

With embedded payments, you can securely authorize and process payments for sales orders and invoices using cards on file — without leaving Acumatica.

Reduce Days Sales Outstanding (DSO) by 80%

Reduce credit card processing costs.

- Manage all of your payment data in a single source and minimize costs with our combined merchant account and gateway
- Take advantage of interchange optimization, which helps reduce credit card processing fees on B2B transactions

Manage account collections in a single view.

- Access and prioritize outstanding invoices with multiple views and sorting options
- Eliminate cross-referencing multiple systems for invoice data

Improve payment flexibility with convenient, built-in features.

- Store multiple cards on file for each customer
- Create, send and automate digital invoices
- Send payment links that help you get paid faster

Automate your receivables the Trace AR way.

Save time, effort, and money, all while accelerating your cash flow.
